

GYS

GYS are Europe's largest manufacturer of battery maintenance equipment and offer a range of jumper cables that are ideal for the workshop or on the road.

GYS Launch Safer Jumper Cables with LED Lights

The new GYS LED jumper cables are a must for every car boot. Each clamp has an inbuilt LED light, which not only aids attachment in the dark, but also allows the user to see colours clearly to avoid the risk of accidentally connecting the cables the wrong way round and causing potentially expensive damage. Operated by a small switch on the clamp, the LED lights are powered by an internal battery. There are two sets in the range: a 300A 3m and a 500A 3.5m version. Prices start from £20.60 + VAT.

GYS Professional Jumper Cables

1
TO GIVE
AWAY

The GYS range of 320A-1000A professional jumper cables are the ultimate leads for the workshop. Suitable for heavy duty commercial use, they feature the highest quality bronze clamps for maximum conductivity and minimal current loss during transfer, while the PVC coating provides flexibility and durability for everyday use.

There are four sets in the range: 320A 3m 16mm², 500A 3m 25mm², 700A 4.5m 35mm² and 1000A 5.1m 50mm², the last of which weighs in

at a hefty 6.5kg! Prices start from just £37.08 + VAT.
