

Easy to use, the hot-air plastic welding kit enables vehicle plastics to be welded. The wide adjustable temperature range (20-700°C) brings plastics up to melting temperature, making them malleable and easy to repair. The air flow maintains a homogeneous fusion of the plastic.

REPAIR

- Bumpers
- Calenders
- Headlight surrounds
- Body panels

VERSATILE & ROBUST

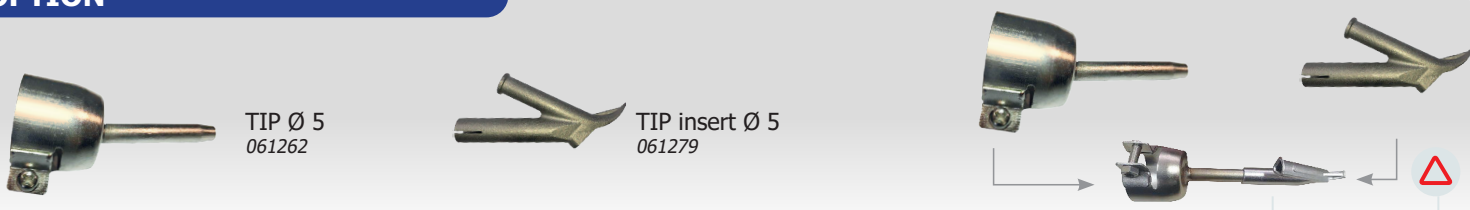

- Adjustable temperature from 20 to 700°C
- 3 interchangeable tips (optional)
- Long service life

COMPOSITION DU COFFRET

OPTION

Power rating (W)	Supply voltage (V)	Frequency (Hz)	Air flow (l/min)	Adjustable temperature (°C)	Weight (kg)	Dimensions (mm)
1 600	230	50/60	230	20 - 700° C	1,3	Ø100 x 300
